

AI helps your team win. It's no longer a dream.

Just as coaches refine their strategy from countless options to suit the condition of players and compatibility with the opponent.

In a short amount of time, Maisart presents a quasi-optimal solution as a winning strategy in situations where there are many solutions to one problem and it is difficult to determine which one is right.

It helps you to make the best possible choice.

We are at the dawn of an era where AI proposing a strategy to improve the odds of victory will serve as a strong ally for your team.

The brand name Maisart originates from abbreviating "Mitsubishi Electric's AI creates State-of-the-ART in technology," and expresses our aspirations to make everything smart using original AI technologies.

Maisart Applications

Recognition / Identification

Capable of highly precise recognition/identification of specific persons, objects, or locations using data input.

Cause Determination

Abnormalities in large-scale facilities determined quickly and accurately.

Problem Detection

Signs of abnormalities detected from data collected during normal operation, helping to prevent problems before they happen.

Optimal Control

Optimal control methods that facilitate more efficient operations are formulated using operational data collected.

Automation

Processing using various sensors enables automated operation with high levels of recognition, identification, and matching beyond the capacity of humans.
