TECHNICAL BULLETIN

[Issue No.] FA-A-0165   **[Page]** 1/2
[Title] External appearance changes of the QCPU-A (A mode)
[Date of Issue] April 2014
[Relevant Models] Q02CPU-A, Q02HCPU-A, Q06HCPU-A

Thank you for your continued support of Mitsubishi programmable controllers, MELSEC-Q series.
This bulletin announces the external appearance changes of the QCPU-A (A mode).

1. Details on the changes

To achieve commonality of the shapes between the QCPU-A (A mode) and the High Performance model QCPU, the external appearance changes of the High Performance model QCPU announced in the previous TECHNICAL BULLETIN FA-A-0163 are also implemented for the QCPU-A (A mode).

Note that although this shape change allows the memory card protective cover (Q3MEM-CV-H) to be attached, the memory card (Q3MEM-4MBS) cannot be used.

(1) Lid closed state

The shape of the lid is changed (figure below[*1]).

CPU module	Before change	After change
QCPU-A (A mode)

**[Date of Issue]** April 2014
[Relevant Models] Q02CPU-A, Q02HCPU-A, Q06HCPU-A

(2) Lid opened state

The slits are added (figure below[*1]).

The model name is additionally displayed (figure below[*2]).

Along with the shape change of the USB connector lid, the shape of the lid lock part is changed (figure below[*3]).

CPU module	Before change	After change
QCPU-A (A mode)		

2. Applicable products and the version on and after the change

For the QCPU-A (A mode), the changes are implemented since the following version.

| Product | Model | Version on and after the change | | Changeover period [*1] |
		Serial number	Serial number location	
QCPU-A (A mode)	Q02CPU-A	First five digits is 16051 or later.	Check the number in either of the following. • SERIAL field in the rating plate on the side of the module • Serial number display plate on the front lower part of the module	May 2014
	Q02HCPU-A			
	Q06HCPU-A			

*1 Depending on the stock situation, the products before change may be delivered no earlier than the changeover period. Please be understanding of this matter.
