Thank you for your continued support of Mitsubishi Electric programmable controllers.

The CC-Link IE TSN remote modules manufactured on and after October 2019 have supported the CC-Link IE Field Network communication mode. Therefore, the modules can also be used as a CC-Link IE Field Network remote module.

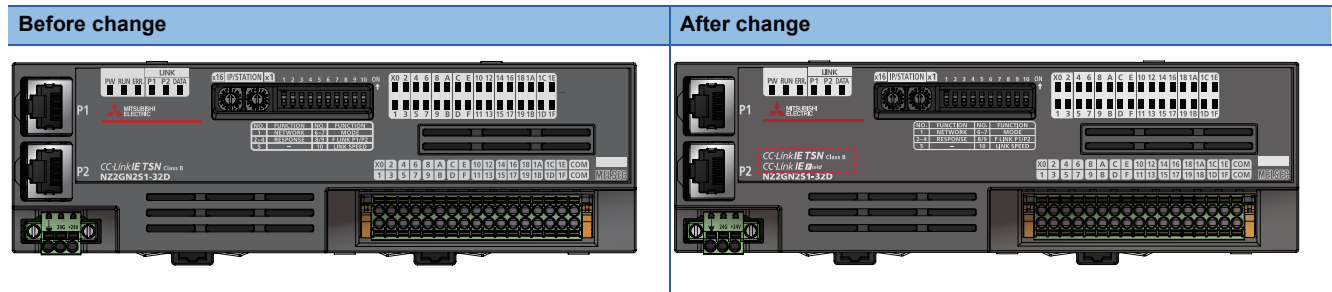

To clarify the above matter, the logo of "CC-Link IE Field" will be added on the front of the relevant modules.

There is no impact on the general specifications, performance specifications, and functions of products due to the change.

1 DETAILS ON THE CHANGE

1.1 Position of the Logo (for the NZ2GN2S1-32D)

The logo of "CC-Link IE Field" is added on the front of the module as follows.

The position of the logo may differ depending on the model.

2 APPLICABLE MODELS AND THE VERSION AFTER CHANGE

The following table lists the version after addition of the logo of "CC-Link IE Field".

The logo is added to all the models which will be released on and after April 2021 and support the CC-Link IE Field Network communication function.

Product		Model	Version after change	
			3rd and 4th digits in the upper side of production information	Location of the production information
