[Title] The A1SD51S intelligent communication module
Correction of the error in the "Life of super-capacitor" graph

[Date of Issue] Jun., '05

[Relevant Models] A1SD51S

Thank you for your continued support of Mitsubishi programmable logic controllers, MELSEC A series.

The graph showing the super-capacitor life of the A1SD51S intelligent communication module (hereinafter referred to as the A1SD51S) has been found incorrect in the following MELSEC-A series manuals:

- Intelligent communication module type A1SD51S (Hardware) User's Manual IB-66550
- Type A1SD51S Intelligent Communication Module User's Manual IB-66551

Note that the error has been corrected in manuals published in April 2005 (IB-66550-C, IB66551-C).

1. Corrected part

Manual name	Part to be corrected
Intelligent communication module type A1SD51S (Hardware) User's Manual	Chapter 1((3) Miscellaneous (c))
Type A1SD51S Intelligent Communication Module User's Manual	Section 3.1.1 Performance specifications list (POINT, (3) Other items (3))

2. Correction

The graph showing the capacitor life of the A1SD51S should be corrected as follows:
