Subject: Notification of appearance change when installing solenoid valve set

Applicable to: RV-5AS series robots

Thank you for your continued support of Mitsubishi industrial robot “MELFA”.

In this technical news , we will inform you about the appearance change when installing the solenoid valve set of RV-5AS series.

1. Models

Collaborative robot RV-5AS series

2. Details of the change

When installing the solenoid valve set, change the packing position attached to the base and add a protective bush. The photos before and after the change are shown below. This change has no affect on the performance or functionality of the product.

3. Reason

To improve the installation workability of customer's optional products (solenoid valve).

4. Change schedule

Switch sequentially from around October 2021.
