

Address the shortage of human resources

Fewer job applicants than expected...

➤ Using robots to solve the shortage of workforce!

- A wide range of robots, mainly small-sized ones, are available to offer the most suitable robot for each task.
- Use the robot where you want to use it, and reuse it after the end of the use.

Seems difficult to introduce a robot...

➤ We will work with our partners to provide full support!

- Easy to use and AI-equipped, our robots can be easily introduced by anyone.
- Total support is provided from the consideration stage to the launch stage.

Concerned about after-sales care after installation...

➤ Complete after-sales service from operation to maintenance!

- Service plans such as inspection and warranty extension are available to support post-installation care.
- Our support offices are located in Japan and overseas, and we support customers around the world.

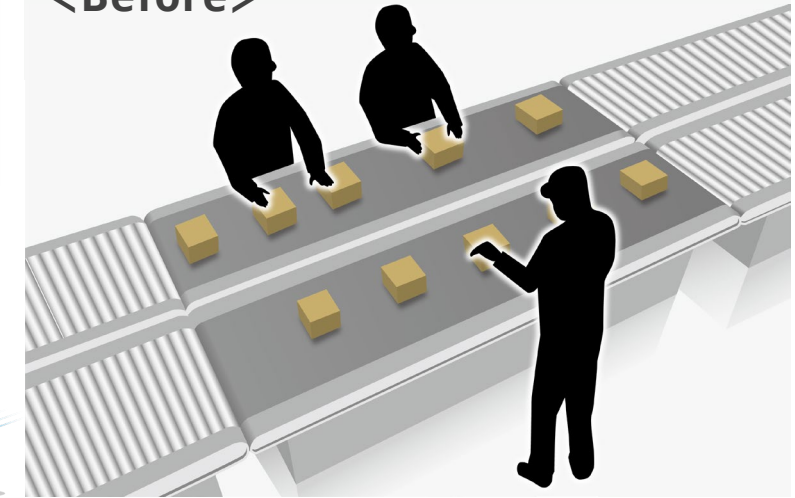

Contribution to the shortage of workforce

Our problems:

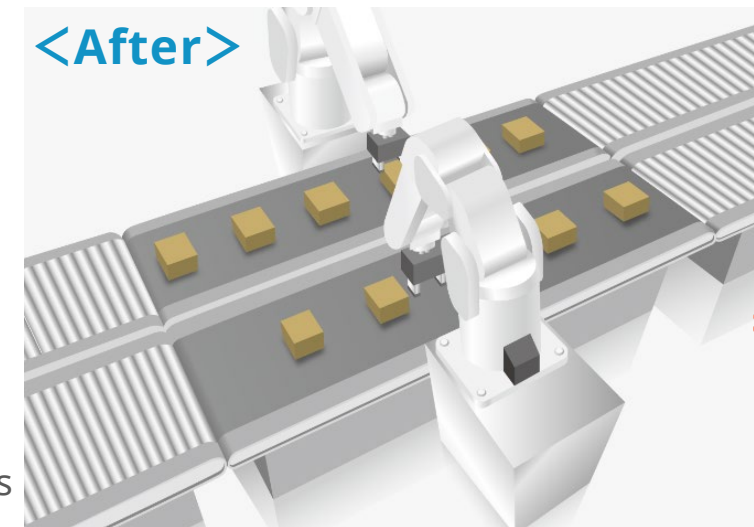

- Few job applicants...
- Risk of a sudden vacancy...

<Before>

<After>

With a MELFA robot...

- Find the best robot.
- Use it where you want to use it.
- Reuse it.
