

Continuous and stable robot operation with minimal effort

Continuous troubleshooting and stable operation

➤ Continuous support during operation or troubleshooting

- Continuous monitoring using software functions for stable robot operation.
- Optimum state kept for the robot with the continuous digital inspection service.

Know running costs in advance

➤ Visualize the service cost by purchasing the additional warranty package

- Free repair of parts covered under warranty when a failure occurs.
- Cost advantage of purchasing this service: approximately 60% compared to the conventional individual contract service.

Purchase the service and set it up easily

➤ Simple purchase and easy setup

- Just select one of the six options. There is no need to sign a complicated agreement.
- Simply insert a special SD card to complete the setup.
