

Aim for a high score by throwing a ball! Beat the robot.

Can you throw better than the robot?

You get 6 balls, the robot gets 3.

➤ See how accurate the robot is

- The robot gets to throw three balls. You get to throw six balls.
- The score gained by throwing three more times than the robot is the key to winning the game.

There are three types of goals. The number of points for each goal is different.

➤ You cannot win if you aim for easy goals

- The robot gets three kinds of goals with high accuracy!
- You need skill, luck, and tactics and must determine when and how many times you will aim for high-score goals.

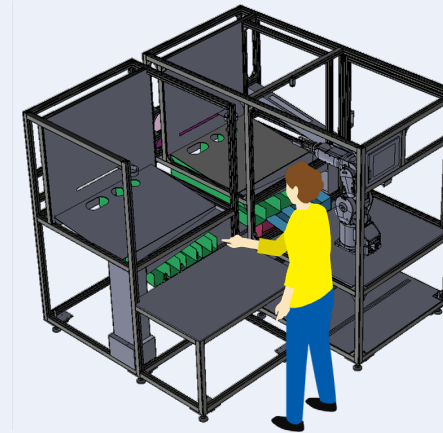

Beat the robot to win a great gift

➤ The total score determines the winner

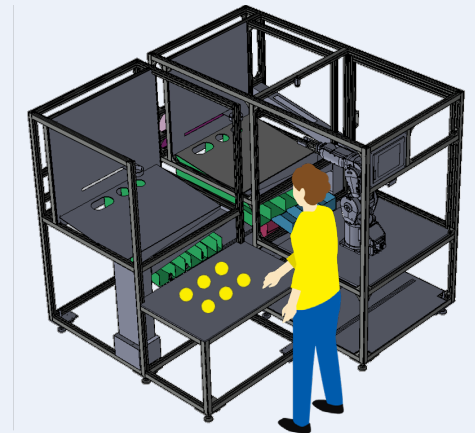

- The winner will receive a special gift! The winner must have a more accurate arm than the robot!
- All participants will receive a participation prize.
