

Visualize results of Energy-Saving Initiatives!

Task Need to understand the current energy usage.

Solution Powerful graph functions help visualize energy use

- The graphical display of energy data reduces the effort required to analyze and identify problem equipment and to generate energy-saving activity reports.

Task Need to manage CO₂ emissions.

Solution Visualize emission data by area and product type

- Visualizing emission data by product type, processing area, and across the entire factory facilitates the comprehensive management of CO₂ emissions.

Task Want to improve staff awareness of energy usage

Solution Sharing dashboards detailing energy saving effects

- Customizing dashboards for each department's viewers effectively enhances employees' awareness of efforts to reduce CO₂ emissions and save energy.

Concept

Comprehensive dashboards are an effective way to visualize and share information with employees!
