Vision Sensor with Deep Learning
IN-SIGHT 2800

Don't worry about **bothersome** selections or **complex** operations.

1. Easy to classify with Deep Learning

- Just register a few images, and Easy to classify without any program or any knowledge.

2. Easy OCR with Deep Learning

- Excellent flexibility about sharp changes due to thickness, blurring, and bleeding of texts.

3. Easy setup about Optical selections

- Multi-lighting (white, red, blue, green)
- Easy setup with Autofocus High-Speed Liquid Lens

4. Equipped with Rules-Based Algorithms

- Difficult Inspections are also possible by Deep Learning and Rules-Base Algorithms.
