

Drawing the world's attention

At Mitsubishi Electric, our proactive emphasis on patents and IP activities is a key part of our business. That's why we have been ranked fourth globally and first among Japanese firms* for number of international patent applications filed. Our portfolio covers a variety of technological fields—from our leading control technologies, to cutting-edge innovations in AI and IoT. We will continue to promote IP activities in Japan and globally, to further advance our technologies and maintain a strong competitive edge.
